Telecommunications Control Technician III

Unclassified. Full Time. \$24.48/hr, State benefits. This position works in the configuration management, monitoring, and troubleshooting of data, voice, or video systems. Responsible for bringing new systems on line, ensuring proper interface and resolve major unplanned network failures with little to no disruption to users. Interfaces new or upgraded systems into the network, forecasting future network operational needs, troubleshooting major and or previously undocumented systems failures, continually testing and analyzing the network and its various systems, and identifying and planning for potential system problems. Analytical thought becomes more important at this level due to increased data and changing situations. Involves leadership as a senior consultant or project leader, or supervisor of a small staff, performing the same or similar work as those overseen.

Incumbent effectively reviews, plans and maintains the physical phone system. This includes providing tactical and strategic input on overall phone system planning and related projects. He/she is responsible for all phone equipment within each branch as well as training of personnel in its use. Performs routine network equipment and telecom system startup and shutdown procedures, and maintains control records. Extracts information required by technicians in identifying the individual wires, cables, and cross connections that make up the network. Tests and analyzes all elements of the data, voice, or video networks, including software, power, communication equipment, lines, modems, and terminals through terminal input. Analyzes information obtained from various computer systems and dials in to remote network concentrators, multiplexers and PBXs to isolate network problems. Monitors network performance in order to determine whether adjustments need to be made, and to determine where changes will need to be made in the future. Diagnose hardware and software problems and repairs, replaces, or adjusts defective components. Must be able to work on multiple projects simultaneously.

Requires successful completion of 24 hours of computer science, telecommunications or video maintenance coursework or appropriate certification; Three (3) years' experience in monitoring and problem solving data, voice, and/or video networks. Must have valid driver's license and ability obtain and maintain DoD Secret Security Clearance, Security Plus certification must be obtained within six months of employment, full color vision, ability to climb ladders, and this position is required to travel throughout the State with occasional overnight stay .
